

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Class A (Hedged) Shares in Great Britain Pounds (ISIN : IE00BJVQR193)

Causeway Defined Growth Fund (the 'Fund'), a sub-fund of GemCap Investment Funds (Ireland) PLC (the 'Company')

The Fund is managed by Gemini Capital Management (Ireland) Limited which acts as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to generate capital growth over the medium to longer term.

The Fund is considered to be actively managed in reference to the Solactive United Kingdom 100 Net Total Return Index, the Solactive US Large Cap Index and the Solactive Euro 50 Net Total Return Index (the "Benchmarks") by virtue of the fact that the Benchmarks are used for performance comparison purposes and the Solactive Euro 50 Net Total Return Index is used as the reference index for the purposes of calculating the global exposure of the Fund using the Relative VaR methodology. However the Benchmarks are not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmarks. The Fund is suitable for investors who are looking for a high probability of capital growth over the medium to long term, but who are able to withstand medium to higher risks, due to the market sensitivity and potentially volatile nature of the underlying investments.

The Fund aims to meet its objective via exposure to a diversified portfolio of defined return investments linked to global equity indices. It will invest primarily in a mixture of Transferable Securities (corporate bonds and government bonds rated at least BBB- by Standard and Poors at outset), Financial Derivative Instruments (FDIs) exposed to global equity indices and cash to gain this exposure. The Fund sells puts, triggered only at their maturity (typically 6 years).

At outset, a defined return investment will only be eligible for inclusion if

it provides for a long-term positive return in anything but the bleakest of market conditions. However, investors should be aware that capital is at risk and in the event of very poor equity market performance over a sustained period it is possible that the Fund could generate negative returns. The use of FDIs means that the Fund will employ leverage.

The Fund may take a long exposure, meaning that it will invest directly, or take investment exposure via FDIs, in a security or securities (i.e. equities) with a view that their value will rise.

Market exposure is not expected to exceed three times the assets under management figure, however, there may be times during unexpected market volatility where this figure may be exceeded.

The Fund will not distribute any dividends in this share class. Income and gains of this share class will be accumulated and reinvested on behalf of shareholders.

You may buy or sell shares on any day on which banks in Ireland and the United Kingdom are open for normal business.

Due to the potentially complicated nature of how the investment manager implements the Investment Strategy of the Fund, the Fund's Target Market, as defined within the MiFID 2 product governance guidelines, does not include Execution Only Retail investors. Therefore the Fund should not be purchased by retail investors without them first seeking Professional Investment Advice.

Risk and Reward Profile

lower potential risk/rewards

higher potential risk/rewards

The indicator above illustrates the position of this Fund on a standard risk/reward category scale. This indicator is based on value at risk calculations and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund's risk category shown is not guaranteed and may change in the future for various reasons including but not limited to general market developments and changes such as geo-political factors.

The Fund is rated 6 due the nature of its investments and takes into account the following potential risks:

Equity Market Risk: The defined return investments within the Fund, whether via FDIs or Transferable Securities, are all dependent on global equity index performance. In the event of sustained, poor equity market performance the value of the Fund could fall and not recover.

Issuer/Credit Risk: The Fund invests in government and corporate bonds. All bonds will be rated at least BBB- by Standard and Poors at outset. If any of the bonds the Fund owns suffer credit events the performance of the Fund could be adversely affected.

Liquidity Risk: In certain market conditions some assets in the Fund may become less liquid than at other times so selling at their true value and in a timely manner could become more difficult.

Counterparty Risk: The Fund may invest in derivative contracts and may find itself exposed to the risk of the insolvency of its counterparties.

Derivatives Risk: The Fund is entitled to use derivative instruments for investment purposes and for efficient portfolio management and/or to protect against exchange risks. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund. The Fund may enter into various financial contracts (derivatives) with another party. Where the Fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation. While the Fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the Fund and the Fund could lose more than the amount invested.

Other Risks: Other risks the Fund is exposed to include but are not limited to are possible changes in interest rates, changing expectations of future market volatility, changing expectations of equity market correlation and changing dividend expectations.

For a more detailed explanation of risks, please refer to the 'Risk Warnings' section of the Prospectus and the Supplement.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One off charges deducted before or after you invest	
Entry charge 5.00%	This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
Exit charge 0.00%	
Charges taken from the Fund over a year	
Ongoing charges: 1.30%	
Charges taken from the Fund under certain specific conditions	
Performance Fee: None	

The entry and exit charges shown are maximum figures. In some cases you might pay less.

The ongoing charges figure is based on expenses for the year ending 31 December 2019. It may vary from year to year.

It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling another collective investment undertaking.

An anti-dilution levy of 2% may be charged on redemptions of 5% or greater of the total assets of the Fund.

For more information about charges, please refer to the 'Fees and Expenses' section of the Prospectus and the Supplement.
